

Zhang Yangkun (张阳坤)

Yao Class Student
Institute for Interdisciplinary Information Sciences
Tsinghua University
Mobile: +86-188-1136-8501
E-mail: hubert.zyk@gmail.com
Homepage: <http://www.hubertzhang.com>

EDUCATION

2012.8 - present	Institute for Interdisciplinary Information Sciences, Tsinghua University B.S. in Computer Science (Date Degree Expected: July, 2016) Major GPA: 91/100, Overall GPA: 89/100
------------------	--

EXPERIENCE

2013.6 - present	Vice president of Lab μ , which is a student club developing handy apps for students.
------------------	---

2014.4 - present	Director of Arts department in the Student Union of Institute.
------------------	--

HONOR AND AWARDS

2014.4	Meritorious Winner in Mathematical Contest in Modeling
--------	--

2012.10	Tsinghua University Freshman Scholarship
---------	--

2012.1	Gold Medal of Chinese Mathematical Olympiad (CMO)
--------	---

PROJECTS

iTUNet

An iOS app which handles network authentication efficiently. The number of users has exceeded 5 thousand in our campus. The website is: <http://tunet.lab.mu/>

TUNow

An Android app which could gather and manage all kinds of information in campus network including courses' notices and campus news. The motivation is from Google Now. More info can be found at: <http://now.lab.mu/>

RESEARCH EXPERIENCE

The performance Analysis of Stream Algorithms on Dynamic Updated Stream

A course project of Fundamental of Big Data. We studied performance variance of algorithms on dynamically updated streams. Three algorithms: MergeSort, QuickSort and Matrix-Vector Multiplication are tested and analyzed.

DFabric System

A system based on optical network which optimizes data transfers with joint management of both optical layer and the network layer. This is the research practice under supervise of Prof Wei Xu, aiming at making full use of reconfigurable optical network and improve throughput.
